Hygiene

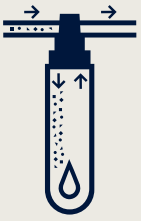

HealthProtect

Better hygiene and unchanged water quality: HealthProtect highlights the strict standards we set ourselves to ensure that our faucets do not affect the taste and smell of the water. To achieve this, we use high-quality materials (metals, plastics) that are ideally suited for contact with water.

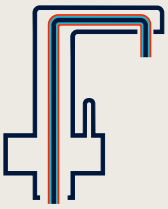

TripleClean

Three water streams for greater flexibility: TripleClean offers a choice of a normal stream for filling glasses, a soft spray for gently cleaning food, and a power spray for pre- rinsing and removing residue.

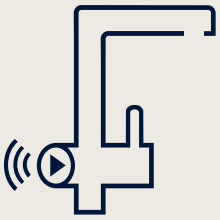

PurifiedWater

Enhanced purity and unaltered water enjoyment: PurifiedWater features advanced filtration technology, this solution minimizes particles larger than 0.5 micrometers, including heavy metals, microplastics, chlorine odors and taste, as well as bacteria. Impeccable water quality to meet the highest standards.

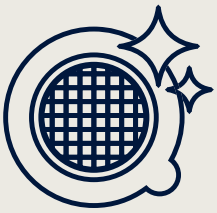

DualFlow

Maximum hygiene and uncompromised safety: With DualFlow, separate water channels ensure that mixed water and filtered water remain completely isolated. An intelligent solution that guarantees absolute purity and unaltered taste.

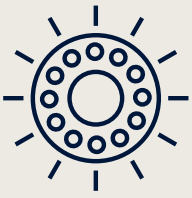

HybridControl

Touchless operation and flexible control: HybridControl allows touchless activation of cold water via a sensor, as well as manual mixing of hot and cold water using the lever. Cutting-edge technology for intuitive handling and versatile applications.

SprayClean

Actively helps with the removal of limescale: With a special faceplate and fastening mechanism, SprayClean prevents limescale deposits. Any deposits are sprayed away automatically when the water is running. For stubborn limescale deposits: simply turn, clean, done.

LEDShine

Visible precision and a bright, friendly workspace: LEDShine not only creates a distinctive ambiance but also makes even the smallest specks of dirt easier to see and allows the faucet to be used without switching on the kitchen light.

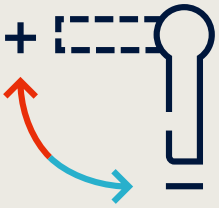

INDEX

Durability

EfficientFlow

Reduced water consumption: EfficientFlow denotes faucets with a flow rate of 5 l/min at 3 bar. Compared with conventional 12 l/min faucets, water consumption is reduced by approximately 58%.

CoolFix

With CoolFix, only cold water flows when the operating lever is in its most commonly used central position. Hot water is only activated when the lever is intentionally moved to the left.

GlacierFinish

Robust surfaces and high-quality craftsmanship: GlacierFinish is equipped with durable surfaces that are exceptionally robust and feature an attractive polished shine that retains its brilliance for years to come.

QualityControl

Exceptional quality from A to Z: with KWC QualityControl, we guarantee the utmost product reliability. KWC performs and continuously monitors all stages of the process: development, production, installation, and even the manufacture of the required tools.

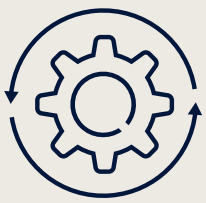

ClickControl

A single movement is all it takes to program and recall the water volume, temperature and spray mode. ClickControl is an intelligent complement to manual operation, making it ideal for everyday use and mindful water consumption without compromising comfort.

ShiftControl

Precise control of water flow: ShiftControl limits the flow rate up to the first lever stop from 5.8–11 l/min at 3 bar to between 2.8 and 3.9 l/min. This setting is ideal for everyday use and reduces water consumption by approximately 52–65% compared with the fully opened lever. Moving the lever beyond the first stop releases the full water flow.

PrecisionMove

Exceptional elegance and precision: PrecisionMove allows for seamless movements and exceptional convenience thanks to our consistent use of top-quality materials and superior craftsmanship.

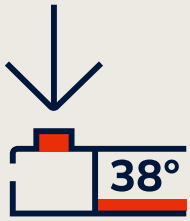

INDEX

Safety

TouchProtect

Safe to use: an insulated hot water guidance system with a “double skin” principle means the body of the faucet or the pull-out spray can become warm but never hot. As such, TouchProtect intelligently prevents scalding.

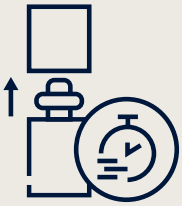

SkinProtect

Reliable protection against scalding: SkinProtect only allows water temperatures above 38°C when the safety button on the temperature controller is pressed. If the cold-water supply is interrupted, the hot-water supply is automatically shut off immediately.

SwivelStop

Stop the faucet from moving too far and prevent water damage: SwivelStop allows the swivel range to be adjusted from 360° to 120° or 150° in just a few steps, ensuring that the water only flows into the sink.

QuickConnect

Easy installation and more safety in the kitchen: with QuickConnect, there is no need to screw on the spray head hose, which means there is also no risk of damaging the seal and causing water damage.

CertificationGuarantee

Trust is good, certifications are better: our KWC CertificationGuarantee ensures that every KWC product is professionally tested and certified in all markets where KWC operates.

SprayLock

Adjust the flow: the selected spray mode remains active even after the water has been turned off. When the water is turned on again, the previously selected spray mode is automatically restored.

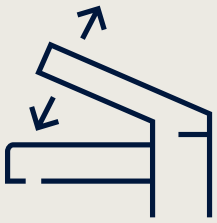

INDEX

Enthusiasm

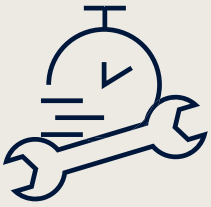

DesignSpray

Elegant design and functionality: With DesignSpray, the pull-out spray is seamlessly integrated and recessed. It can be pulled out easily with just one finger.

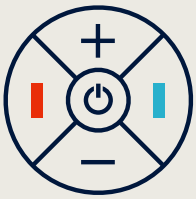

UniqueLever

Distinctive lever designs for natural, intuitive operation: UniqueLever embodies KWC's innovative design philosophy, combining elegance and precision in a way that can be seen and felt every day.

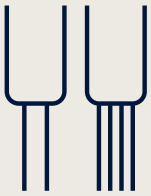

QuickInstallation

Easy positioning and secure fastening of the threaded connection for quick and effortless installation: the locking nut is screwed into place by hand to hold the faucet in position using QuickInstallation, before it is fixed in place by tightening the two locking screws.

IntelligentControl

Intuitive control meets modern convenience: IntelligentControl reacts to the tap of a finger, can be programmed to store individual usage preferences, and features a light ring that indicates the selected water temperature.

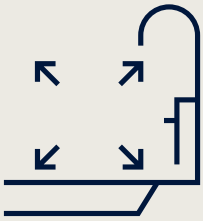

PowerClean

Select the desired spray mode at the touch of a button: PowerClean enables effortless switching between a standard spray and a fine spray directly on the spray head.

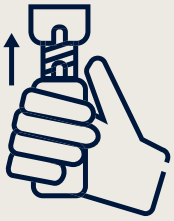

TwistProtect

Effortless work around the sink: TwistProtect prevents the hose from twisting or knotting.

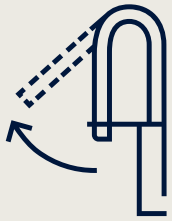

OptimalSpace

Practical yet elegant ergonomic design: OptimalSpace features long, tall spouts that provide generous working space.

EasyLock

A spray that is easy to use and automatically snaps into place: EasyLock is equipped with special positioning pins that ensure that the pull-out spray is always in the right position.

HighFlex

Greater freedom of movement and enhanced comfort: HighFlex lets the spring hose move effortlessly in every direction while remaining stable when not in use.

INDEX

The bathroom as an oasis of well-being

Recharge your batteries and take a break – or quickly and easily get ready for the day ahead: with our wash basin, shower and bath taps, every bathroom can become your haven of relaxation. A wide range of design-strong taps that not only look great, but are also a lasting delight thanks to their intuitive and safe operation and their high-quality materials.

INDEX

KWC ACTIVO

A unique design

KWC ACTIVO is so bold and self-assured that it can even be combined with more playful elements to create a well-balanced, stylish whole that perfectly harmonizes rigorous design, sensuality and lightheartedness. A line of faucets with a dynamic feel that brings fresh energy into the bathroom every day.

Inviting lines: the lever is slightly bent upward, which makes it fit perfectly into the user's hand and also gives off a feeling of openness and lightheartedness.

KWC AVA 2.0

Design and function in playful harmony

Unique flat lever, elegant soft-cube design, ultrasleek silhouette – those with an eye for the essential will recognize the clear statement in the KWC AVA 2.0. Whoever lives here knows exactly what they want from life – and from their bathroom: stylish confidence, simple elegance, excellent quality, and functionality so perfect that you barely even notice it.

The unique flat lever of KWC AVA 2.0 is symbolic of its perfect synthesis of modern architecture and contemporary lifestyle.

Perfectly adjusted water stream: The PERLATOR® HONEYCOMB® SSR aerator allows the direction of the water stream to be adjusted to suit the washbasin.

KWC AVA E

Pure elegance for the bathroom

Elemental joy for architectural devotees: the refined round and square designs ensure that the award-winning faucets integrate seamlessly into their surroundings, the purist design language is complemented by the stainless steel components. This creates a harmonious counterpoint between the sleek silhouette and its practical nature, its matte finish gently reflecting the tones of its surroundings.

INDEX

KWC BEVO

Harmony in form and function

The KWC BEVO impresses with its clarity of design and clean lines. The slim silhouette, elegantly shaped spout, and unmistakable lever design are a testament to this. Premium materials and precise workmanship underscore the high quality and durability.

The basalt grey cap cleverly accentuates the weightlessness of the fitting, giving the lever a floating appearance.

KWC DOMO I 6.0

Switzerland’s most popular faucet quality redefined

Few design objects have managed to remain modern for almost 40 years, but the KWC DOMO, probably Switzerland’s best-selling faucet, has done just that. And that is not where its story ends. This millionfold proven faucet has undergone careful design developments and been combined with cutting-edge technology to create the latest generation with an even wider range of products: KWC DOMO | 6.0.

Modern look, flawless feel, ergonomic design: the lever and cap form a single unit, eliminating the need for a slit on the top and ensuring the faucet is even more hygienic.

KWC ELLA

Go with the flow

Understated yet bold, refined yet daring – what may seem like a contradiction is actually the key to creating classic design. And KWC ELLA is just that: with its subtle curves, smooth angles, and clear contours, the line of faucets will be as modern tomorrow as it is today.

Restrained confidence: with its subtle, self-assured style, this faucet lends a special touch to every bathroom.

INDEX

KWC FIT

Beauty without frills

You reach perfection when there is nothing else to leave out. KWC FIT – a faucet pared down to the essentials. Ingenious functionality, top-quality workmanship, refined details, a pleasant feel and an attractive price – not to mention the aesthetics that visually emphasize the art of simplicity.

Without any superfluous details, the essentials really come into their own – in terms of both appearance and experience. Take the gentle lever movement, which makes this faucet remarkably smooth to use.

KWC ONO E

Pure stainless steel aesthetics

Clear lines, high quality materials, refined down to the last detail and a pleasure for all the senses: the quality of the design matches the quality of the construction. The KWC ONO E is made of pure stainless steel with a brushed or chrome-plated surface, which together ensure complete hygiene. The sleek design is complemented by the durable construction – a tap that adds a brilliant touch to any premium bathroom.

The KWC ONO E in stainless steel is already a design classic, and with a diameter of 35 mm, slimmer and more elegant than ever before. Whether with a chrome-plated or brushed finish, this is a stylish premium product from the KWC brand.

INDEX

INDEX

INDEX

The cascade spout acts like a small waterfall in the bath. It is easy to clean. The design and mounting help to prevent unintentional impact with your body.

The aerator is adjustable and almost invisible.
For cleaning, simply unscrew and descale separately.
The characteristically tall, arched lever mixer provides great freedom of movement in the basin and sets visual highlights in the bathroom.

The KWC ONO E is a complete range with a variety of options for every application in the premium bathroom. Everything is exquisitely finished and seamlessly rounded. Quality and durability are absolutely top class thanks to the high-quality stainless steel.

KWC ORA

Artistic elegance

The KWC ORA translates formal precision into a striking design language that elegantly integrates with the washbasin. It embodies lifestyle without compromising on function. The knob lever feels comfortable in your hand, while the aerator impresses with a practical detail: Its individually adjustable angle minimizes splashed water – regardless of the basin's shape or size.

KWC VITA 2.0

Exemplary durability

This special tap has been specifically developed for people with motor and sensory limitations. It's perfect wherever user-friendliness, sturdiness and good ergonomics are required. The design of the KWC VITA 2.0 allows for simple cleaning. This guarantees a high level of hygiene and long service life even with intensive use.

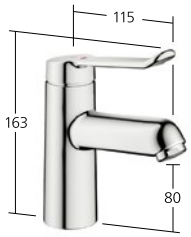

The hot and cold water markings are extra large and easy to read. The long lever is particularly straightforward to operate without much force. The curved shape makes cleaning easy. There are no recesses on the lever, no joints and no escutcheon. This helps prevent dirt from accumulating. The Neoperl Perlator with metal sleeve generates a hygienic laminar stream without drawing in any ambient air. It also minimises water and energy consumption.

INDEX

INDEX

KWC VITA PRO 2.0

For special demands

The KWC VITA PRO 2.0 is perfect for exceptionally high day-to-day demands. The stable bar lever on the tap is extraordinarily robust. It's very comfortable in the hand, and can also be used with the elbow or forearm. The bar lever can be shortened as required and fitted at 180 degrees if desired. The KWC VITA PRO 2.0 is easy to clean, and stands out thanks to its hygienic technologies.

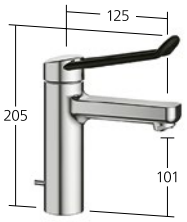

Thanks to its non-slip surface, the extra-long, ergonomic lever is easy to operate with little effort, whether by hand, elbow or forearm. The Neoperl Perlator with metal sleeve generates a hygienic laminar stream without drawing in any ambient air. It also minimises water and energy consumption.

INDEX

KWC WAMAS 2.0

A sturdy all-rounder

As a new development of a previous model, the KWC WAMAS 2.0 is more streamlined and slightly taller than its predecessor. With the conical body, its design is impressive while remaining simple and functional. The spout and lever are slightly arched in shape. This allows for a smooth water flow, keeps the components clean for a long time and ensures easy cleaning. The material also guarantees the tap's long service life. The KWC WAMAS 2.0 always keeps pace with the times in terms of its look and feel.

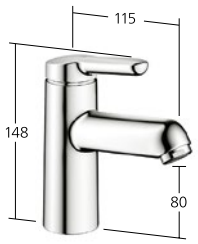

The curved shape makes cleaning easy. There are no recesses on the lever, no joints and no escutcheon. This helps prevent dirt from accumulating. The adjustable aerator with metal sleeve keeps water consumption and spray to a minimum.

KWC ZOE

The epitome of elegance

KWC ZOE adds a touch of sophisticated glamour to your bathroom. This elegant innovation is reminiscent of a fountain – not just in terms of its stunning shape, but also thanks to its cutting-edge technology. With its sculptural style, it symbolizes the purity of a natural spring and brings a touch of minimalist splendor into your bathroom. KWC ZOE is equally at home in upmarket private residences as it is in hotels and restaurants.

KWC ZOE truly proves its worth in households where small children are around. Cold water flows when the lever is pointing forward and mixed water runs when it is in the central position, keeping guests of all ages safe from scalding in the bathroom.

KWC Stainless steel basin

Seamless elegance

Whether round or rectangular, the stainless-steel washbasin options from KWC impress with precise radii and edges. The durable material enables effortless, hygienic cleaning and a special coating reduces the appearance of fingerprints perfect – for everyday use. The special brushed finish on the material clearly stands out from conventional surfaces and harmonises perfectly with the stainless-steel lines KWC ONO E and KWC AVA E. Beautifully sophisticated, yet also environmentally sound: at the end of its long life cycle, the washbasin is fully recyclable.

ShowerCulture

Showering is a product of our culture. Harnessing the power of water and using it to increase our well-being is something that makes our everyday lives easier and more pleasant. But there is more to showering than meets the eye. KWC takes things a step further – ShowerCulture makes showering an experience tailored to individual preferences, from invigorating to relaxing. Showering with all the senses is one of life's simplest yet purest pleasures.

Technical information
The bathroom tap applications illustrated in this brochure are examples. Technology and design may change as product development progresses. The suitability of the fittings must be checked individually for each property. Only the specifications and the installation and service instructions of KWC Group AG are authoritative for planning and technical realization. We reserve the right to make changes to the range, model and technical specifications. Dimensions in mm.

Color differences on stainless steel surfaces on different parts of a KWC Group AG faucet made out of stainless steel, cannot totally be excluded. Different factors may lead to a slight color differentiation.

1. Already a slight difference in material composition may cause stainless steel to reflect light differently (more blue or yellow reflections). These differences in steel compositions still fulfill DIN valid material standards. They may occur within one lot of a steel production unit.
2. Different cooling or production treatment parameters may also cause color surface differentiation.
3. Different surface consistency caused by the production process may as well lead to a different light reflection, so that other colors appear.

Our aim is not to have another surface process to guarantee a 100 % stainless steel color consistency. Beside the unique KWC faucet design we would like to keep a puristic surface finish of natural stainless steel in match with our design philosophy.
